

Recycled DirtTech

Mattservice

Why Recycled DirtTech?

- › Acts as a barrier and stops dust, dirt and water at the entrance - 24/7.
- › Contributes to increased safety as the underside, which consists of 34% recycled rubber, can help prevent falls and tripping accidents because the mat does its best not to move and lies flat on the floor.
- › The color is specially designed to hide dirt and dust.
- › Produced from 100% Econyl® yarn which is from recycled industrial and consumer waste.

Benefits

- › Protects floors
- › Stops both dry and wet dirt
- › Less maintenance costs and easier cleaning
- › Creates a better indoor environment
- › Good absorption ability
- › Antistatic
- › Elis carpets are not flammable and do not develop harmful smoke gases in the event of a fire

GLOBALA MÅLEN
för hållbar utveckling

**We are the first
company in Sweden to
be certified against the
UN's global goals.**

**All our mat and
mop cleaning
services are Nordic
Ecolabel certified**
